-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

Claims 4-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-13 not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by O'Phelan et al USPN 5,876,424.

O'Phelan et al. show a prior art device in figure 2 that has a first flat wall at the top of the drawing (see generally at 20) and an opposing second flat wall on bottom, the walls are joined by a curved circumferential third wall with the top section of the wall having a smaller curvature of radius than the the curve section adjoined to the second, bottom wall. The examiner considers the limitation of the first wall adapted to face the skin of the patient to be a limitation

without bound, since the limitation is viewed as an intended use that adds no structural restrictions since 1) it depends on how the physician intends to implant the device and 2) all walls of implants are adapted to be planted to face the skin 3) due to the skin being circumferentially enclosed, all implant walls face the skin of different portions of the body. Applicant's second statement of intended use regarding the relative electric field strengths is likewise given little patentable weight since it depends upon the location of the implanted electrode to the location of the walls of the implant device. Since the lead/electrode is not positively recited and the claim is not a method claim, such limitations do not adequately define over O'Phelan. O'Phelan teaches the entire enclosure were made of metal and thus each of the wall members. The applicant may wish to define relative dimensions of wall distances rather than "intend use" statements to better define their invention over O'Phelan et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark W Bockelman whose telephone number is (703)-308-2112. The examiner can normally be reached on Monday - Thursday 10-8:30.
